Report of the Directors & Management Discussion and Analysis Report

Your Directors have pleasure in presenting the Annual Report for the year ended 31st December 2015.

ECONOMIC ENVIRONMENT

The Global economy growth in 2015 had not been as good as was expected. Even though growth was noticed in United States and United Kingdom, Euro Area and Japan lagged behind. China is still growing at a decent pace however on a path of gradual deceleration.

Amongst all these, India with GDP growth of 7.4% in the July-September quarter went ahead of China where growth was 6.9% for the corresponding period, firmly cementing its position as the world's fastest growing major economy in 2015. The growth of Indian economy has to be seen in the backdrop of negative export growth during the year due to stagnation in global economic growth and another bad monsoon. The GDP growth in 2015 was mainly fuelled by falling crude prices which was the lowest in the decade and also other commodity prices. This helped check the balance of payment from going awry. This was because crude is one of the largest import baskets and the lower price helped raise the economy. The low crude prices helped improving corporate performances overall and your Company, with petro based products being one of the major inputs, was no exception and accordingly reaped the benefit of the price drop. However, the devaluation of the Chinese yuan contributed to the fall in Indian rupee which to some extent set off the benefit achieved from lower crude price. As inflation eased, the Reserve Bank of India (RBI) cut interest rates four times this year to reduce the cost of borrowing and help stimulate growth.

Amongst major factors which is considered to revolutionize the Indian business scenario, expectations remains high that key reforms, in particular a long-delayed goods and services tax (GST) bill would be passed shortly. India's GDP growth is expected to be stable at 7.5% in 2016-17 as it is more dependent on its inherent strength and is less exposed to external factors, including slowdown in China and global capital flows.

EMPLOYEE BENEFITS

(a) Short-term Employee Benefits

Short-term Employee Benefits (i.e. benefits falling due within one year after the end of the period in which employees render the related service) are recognised as expense in the period in which employee services are rendered as per the Company's scheme based on expected obligations on undiscounted basis.

(b) Post-employment Benefit Plans

Post-employment benefits comprise Provident Fund, Superannuation Fund, Gratuity, Pension and Retirement Benefits which are accounted for as follows:

- i. Provident Fund - Certain employees of the Company receive provident fund benefits, which are administered by the Provident Fund Trust set up by the Company. Aggregate contributions along with interest thereon are paid at retirement, death, incapacitation or termination of employment. Both the employees and the Company make monthly contributions at specified percentage of the employees' salary to such Provident Fund Trust. The Company has an obligation to fund any shortfall in return on plan assets over the interest rates prescribed by the authorities from time to time. In view of the Company's obligation to meet the shortfall, this is a defined benefit plan. Actuarial valuation of the Company's liability under such scheme is carried out under the Projected Unit Credit (PUC) Method at the year end and the charge, if any, is recognised in the Statement of Profit and Loss. Actuarial gains/ losses are recognised immediately in the Statement of Profit and Loss as income/expense.
- ii. Superannuation Fund - This is a defined contribution plan. The Company contributes a certain percentage of the eligible salary for employees covered under the scheme towards superannuation fund administered by the Trustees. The Company has no further obligations for future superannuation benefits other than its contributions and recognises such contributions as expense in the period in which the related employee services are rendered.
- iii. Gratuity - This is a defined benefit plan covering eligible employees. As per the scheme, the Gratuity Fund Trust administered by Trustees, makes payment to vested employees at retirement, death, incapacitation, or termination of employment, of an amount based on the respective employee's salary and the tenure of employment. Vesting occurs upon completion of five years of service. The liability is determined based on year-end actuarial valuation using PUC Method. Actuarial gains/losses are recognised immediately in the Statement of Profit and Loss as income/expense.
- iv. Pension - The Company has discontinued the Defined Pension Benefit scheme with effect from 1st May 2009 and all the employees who were members of the erstwhile Defined Pension Benefit scheme has been brought under the Defined Contribution scheme for benefit provisions under the Pension plan. The present value of benefit obligation is actuarially determined at the end of each year by discounting the present value of crystallised pension as at 30th April 2009. Actuarial gains/ losses are recognised immediately in the Statement of Profit and Loss as income/expense.
- v. Retirement Benefit - Liability accrued during the year in respect of retirement benefit payable to certain employees governed by agreement with the Union representing them are treated as a defined benefit plan. As per the scheme, a lumpsum benefit is paid to the eligible employees on cessation of service with the Company. The Company's liability is actuarially determined using the PUC method at the end of each year. Actuarial gains/ losses are recognised immediately in the Statement of Profit and Loss as income/expense.

(c) Other Long-term Employee Benefits (unfunded)

The cost of providing other long-term employee benefits (Leave Encashment) is determined using Projected Unit Credit Method, with actuarial valuation being carried out at each Balance Sheet date. Actuarial gains and losses and past service cost are recognised immediately in the Statement of Profit and Loss for the period in which they occur. Other long-term employee benefit obligation recognised in the Balance Sheet represents the present value of related obligation.

(d) Terminal benefits are recognised as expense as and when incurred.

Notes to the Financial Statements

PROVISIONS AND CONTINGENT LIABILITIES

Provisions are recognised when there is a present obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation as at the Balance Sheet date and are not discounted to its present value.

A disclosure for contingent liabilities is made when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

TAXATION

Current tax represents the amount that otherwise would have been payable under the Income-Tax Act, 1961 had this financial year been reckoned as the basis for computation of tax payable under the prevailing taxation laws. (Also refer Note 29).

Deferred tax is provided on timing differences between taxable income and accounting income measured using tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date.

Deferred tax assets are recognised only if there is a virtual / reasonable certainty, as applicable, in keeping with Accounting Standard 22 on 'Accounting for Taxes on Income' that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are reviewed for the appropriateness of their respective carrying amount at each Balance Sheet date.

LEASES

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the Statement of Profit and Loss on a straight-line basis over the period of lease.
